LCD Display

- Ⓐ Battery Power Status
- Ⓑ Volume level
- Ⓒ Auto Off status
- Ⓓ Short Timer set
- Ⓔ Memory number and seconds
- Ⓕ Time and Frequency
- Ⓖ Band indicator
- Ⓗ Weather Alert indicator

Installing batteries

1. Position the radio face down on a soft surface.
2. Remove the catch as shown and lift out the battery cover.
3. Insert 2 x “D” size/UM-1/LR20 batteries.
4. Replace the battery cover and catch.
5. Reduced power, distortion, a “stuttering” sound are all signs that the batteries may need replacing. The batteries should be replaced when the battery indicator  flashes and E shows in the display.
6. If the radio is not to be used for any extended period of time, it is recommended that the batteries are removed from the radio.

Using the AC adaptor (not supplied)

1. Remove the rubber cover of DC in socket on the left hand side of your radio.
2. Insert the adaptor plug into the DC socket.
3. Plug the adaptor into mains socket outlet. Whenever the adaptor is used, the batteries are automatically disconnected.

GB

The AC adaptor should be disconnected from the mains supply and the radio when not in use.

Note:

For safety purpose, DO NOT use AC adaptor in the shower room. Use the batteries only.

Setting the clock

1. The clock will start running when the batteries are installed or when the radio is connected to the mains supply. The display will show “ - : - - “.
2. The time can be set with your radio switched off or on.
3. Press and hold down the Time Set button  for approx. 2 seconds until the hours digits flash in the display with a beep.
4. Press the Tuning Up/Down buttons to set the required hour.
5. Press the Time Set button, the minute digits will flash in the display.
6. Press the Tuning Up/Down buttons to set the required minute.
7. Press the Time Set button to complete time setting.
The second will start to count.

Operating your radio

Your radio is equipped with three tuning methods – Manual Tuning, Search tuning and Memory preset tuning.

Manual Tuning

1. Press the Power button to turn on the radio.
2. Select the required waveband by repeatedly pressing the Band button. For FM waveband, pull out and extend the FM wire antenna located in the battery compartment to get best reception. For MW (AM) waveband, rotate the radio for best reception.
3. A single press on either Tuning up or Tuning down buttons will change the frequency in the following increments:
FM: 100 or 200 kHz (USA version)
50 or 100 kHz (standard version)
AM (MW): 9 or 10 kHz
4. When the waveband end is reached, the radio will continue tuning from the opposite waveband end.
5. Press the Volume Up/Down buttons to the required level.
6. To switch off your radio, press the Power button. The display will show OFF.

Search tuning

1. Press the Power button to turn on the radio.
2. Press the Band button to get required waveband, then extend and position telescopic aerial (FM) or rotate the radio (AM).
3. Press and hold down either Tuning up or Tuning down buttons for more than 0.5 seconds to commence Search tuning.
4. The radio will search and stop automatically when it finds a station of sufficient strength.
5. When the waveband end is reached, the radio will continue tuning from the opposite waveband end .
6. Press the Volume Up/Down buttons to the required level.
7. To switch off your radio, press the Power button. The display will show OFF.

Memory preset tuning

Storing stations in preset memories

There are 5 presets for each waveband (FM1/FM2/AM/WX).

1. Press the Power button to turn on the radio.
2. Tune to the required station using one of the methods previously described.
3. Press and hold down required preset until the radio beeps (more than 2 seconds). The preset number will appear with a M (memory) and the station will be stored under the chosen preset button.
4. Repeat the procedures for the remaining presets.
5. Stations stored in preset memories may be overwritten by following the above procedures.

Recalling preset stations

1. Press the Power button to turn on the radio.
2. Select the required waveband by pressing the Band button.
3. Momentarily press the required Preset button, the preset number and station frequency will appear in the display.

GB

Software version

The software display cannot be altered and is just for your reference.

1. Turn off the radio.
2. Press and hold the Preset button 3 for 2 seconds until the software version number (e.g. P01) shown on the display.

Setting Tuning step

3. Continue pressing the Preset button 3 and you will hear a beep. The display will switch to tuning step setting. Press the Tuning up/down button to choose the desired FM tuning step (50 kHz or 100 kHz) and press the Preset button 3/step button to confirm the setting.
4. After the confirmation of FM tuning step, press the Tuning up/down button to choose the desired AM tuning step (9kHz or 10 kHz) and press the Preset button 3/step button to confirm the setting.

Weather alert system

The weather alert function on the radio can alert you to special weather related emergencies. During an emergency or weather-related hazard, NOAA issues an emergency tone that will set off an audible and/ or visual alarm on the radio.

Note:

Hazard warnings are not available in all areas. There are 7 standard NOAA weather channels used in the US and Canada. The radio receives broadcasts up to 40 miles from transmitting stations.

1. To listen to the standard NOAA weather channels, turn on the radio and extend the FM wire antenna located in the battery compartment to get better reception. Then press the Band button until WX shows on the display.

2. The channel number of the weather station is shown on the display. Press the Tuning up/ down button to select the programmed channels. There should be one or more weather service stations broadcasting in your local area. You will hear a report that is updated usually once or more per day for your area. If there is a severe weather or weather-related emergency, NOAA will update weather broadcast more frequently. If there is a weather emergency, the NOAA will issue an alert tone.

Setting the weather alert

1. Following the steps above to tune the required weather station.
2. Press and release the Alert button  to activate the weather alert mode. **WX-ALERT**  will show on the display. If NOAA issues a weather related emergency, the radio will automatically alert you with a siren continuing for 15 seconds and a flashing light on the right hand side of the unit. After 15 seconds of siren, your radio will return to normal broadcasting for 12 minutes. Then your radio will be put into weather alert standby mode.

Note:

1. When the radio is set to weather alert mode, all the buttons on the front panel will be invalid.
2. When the siren is active, press any button on the radio instantly turns the radio to the weather broadcasting and cancel the siren. Then press the Power button to return to weather alert standby mode.

Turning off the weather alert

Press and release the Alert button to turn off the weather alert. Your radio will then be back to standby mode.

Sleep function – Auto Off

The sleep timer will automatically switch off your radio after a pre-set time has elapsed.

1. Press and continue to hold down the Power button, the display will cycle through the available sleep times in the order 50-40-30-20-10-60-50..... Release the button when the required sleep time appears in the display. Display will appear AUTO OFF and radio will play the last station selected.
2. To cancel the sleep function, press the Power button, the AUTO OFF will disappear and the radio will switch off.

Nap timer (short timer)

You can set the Nap timer (short timer) either radio is on or off.

Press Nap timer button , display will appear  and flash last nap timer time. Press Tuning up/down button to select required nap timer time, press Nap timer button again to complete setting.

GB

Nap timer will start to count by second, display will show  and remaining nap timer time (when radio is off). The buzzer will sound for 3 minutes when it reaches the period of time which you have set. Press Power button to turn the buzzer off.

To turn off the Nap timer before the time is up, simply press and release the Nap timer button.  will disappear from display.

You can also memory the nap timer time by long pressing Preset 1-5 button for the timer time you require (same procedures you store the station) and recall it whenever you need to set timer. e.g. you can store 10 minutes timer in preset 1 and 20 minutes timer in preset 2, so each time after you need to select short timer time, press short timer button then preset 1 to get 10 minutes timer and preset 2 to get 20 minutes timer and so on.

Factory reset

If you wish to completely reset your radio to its initial state this may be performed by following this procedure. By performing a factory reset, all user entered settings will be erased.

Press and hold Preset 5 button and the Band button together until 'dEF' shown on the display followed by an beep. Now the factory reset is completed.

Display backlight

The display backlight will be switched on for approximately 15 seconds when any button is pressed.

Emergency buzzer

To activate Emergency buzzer, press and hold Emergency buzzer button . Press and release the button again to switch off the buzzer.

Torch

Press to release the torch button  to turn on the torch.

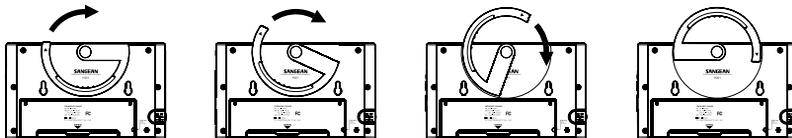

Note:

The torch won't turn off automatically. To turn off the torch, press torch button again.

Multi-purpose handle

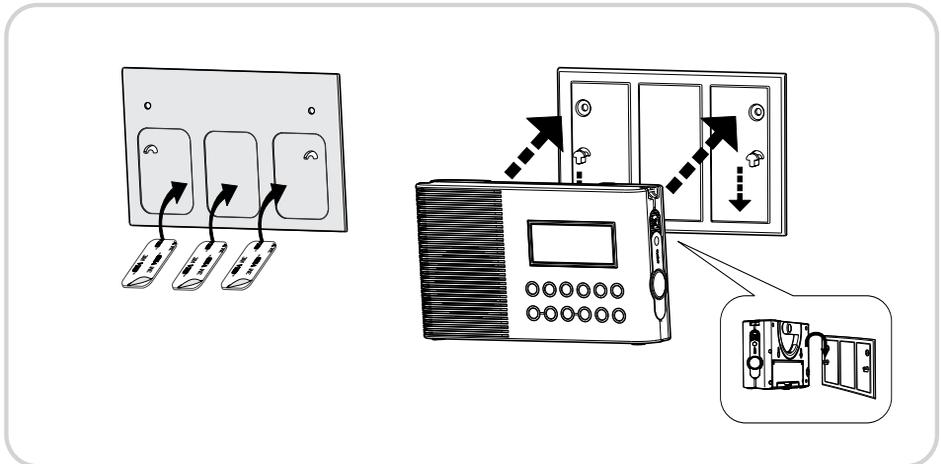

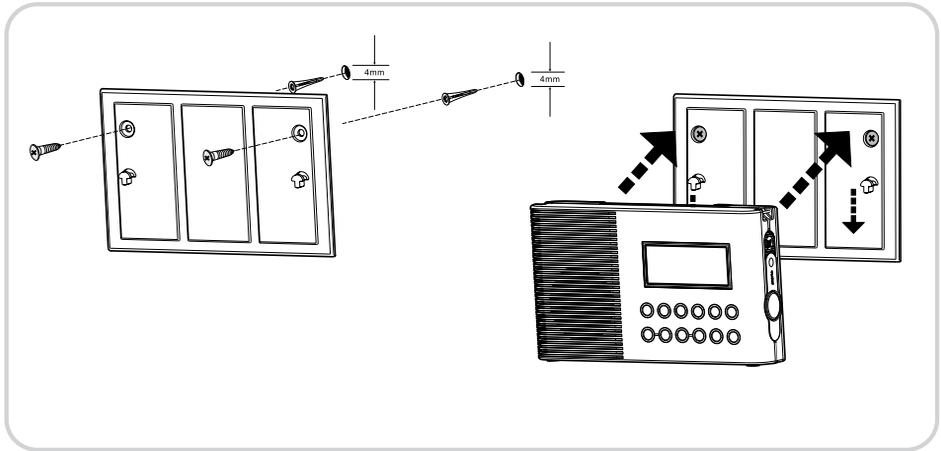

Using the multi-purpose handle, you may hang or carry the radio when not used in bathroom.

Bracket

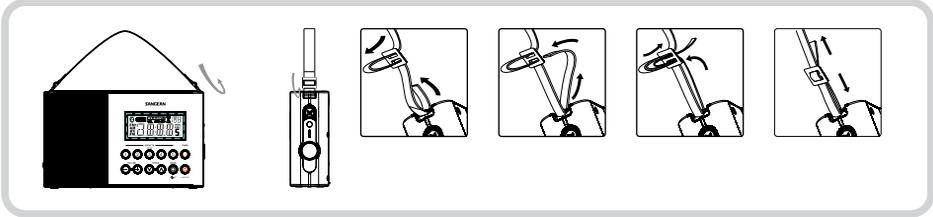

You may install the supplied bracket on the wall with the help of the double sides tape back side to hang the radio.

GB

Carrying strap

Using the supplied carrying strap, you may hang or carry the radio when not used in bathroom.

Specifications

Power requirements

Mains via AC adaptor (not supplied)

AC 230 volts, 50 Hz or AC 120 volts, 60 Hz ~ only/DC 3V 500 mA

Batteries: 2 x UM1 (D size, LR20)

Battery Life:

Approx. 120 hours of listening for 4 hours a day at normal volume using alkaline batteries.

Frequency Coverage:

FM 87.50 – 108 MHz

AM (MW) 522 – 1710 kHz or 520 – 1710 kHz

WX: 162.4~162.55 MHz

Circuit features

Loudspeaker: 3 inches, 8 ohm full range, water resistant

Output Power: 500 mW

Aerial System:

FM/WX Antenna wire

AM (MW) Ferrite Rod
