

# IMPORTANT SAFETY INSTRUCTIONS

When using an electrical appliance, basic precautions should always be followed, including the following: Read all instructions before using this appliance.

## DANGER — To reduce the risk of electric shock:

- 1) Always unplug this appliance from the electrical outlet immediately after using or cleaning.
- 2) Do not place or store power pack where it can fall or be pulled into a tub or sink. Do not fully immerse in or drop into water or other liquid. Store in dry place.

## WARNING — To reduce the risk of burns, fire, electric shock, or injury to persons:

- 1) An appliance should never be left unattended when plugged in. Unplug from outlet when not in use, and before putting on or taking off parts.
- 2) This appliance should not be used by, on, or near children, or individuals with certain disabilities.
- 3) Use this appliance only for its intended use as described in this manual. Do not use attachments not recommended by Conair.
- 4) Never operate this appliance if it has a damaged cord or plug, if it is not working properly, or if it has been dropped or damaged, or left in water for an extended period of time. Return the appliance to a Conair Service Center for examination and repair.
- 5) Do not carry this appliance by supply cord or use cord as a handle.
- 6) Keep the cord away from heated surfaces.
- 7) Never operate the appliance with the openings blocked. Keep the inlet openings free of lint, hair, and other particles.
- 8) Never drop or insert any object into any opening.
- 9) Do not use outdoors.
- 10) Do not operate where aerosol (spray) products are being used or where oxygen is being administered.
- 11) To disconnect, turn all controls to the OFF position, then remove transformer plug from outlet.
- 12) Do not use if you have insensitive or sensitive skin areas or poor circulation. Use by unattended children or incapacitated persons may be dangerous.
- 13) Disconnect power when not using your bath spa.
- 14) Never use while sleeping or drowsy.
- 15) **For use with the Conair supplied adaptor model: SW-110218A only.**

# SAVE THESE INSTRUCTIONS FOR HOUSEHOLD USE ONLY

## CAUTIONS

- This unit should not be used in the following cases unless directed by physician: Tuberculosis, benign and malignant tumors, hemorrhages, inflammations of the skin, phlebitis and thrombosis, open and fresh wounds, bruises, broken skin or varicose veins, or undetermined calf pain.
- Consult your physician if you have any questions regarding therapeutic use of this Bath Spa.
- Do not use if any unexplained pain before consulting your physician.
- Discontinue use of unit if pain is present increases or swelling occurs after use.
- Do not use on any part of the body that is anesthetized.
- Do not use if recent surgery has been performed.
- Never use without removable filter.
- If you are pregnant, consult your physician before use.

## HOW TO USE

- 1) With unit securely placed on tub (see “How to Attach Bath Spa to Tub”), place the power pack as far away from tub as possible so that it cannot easily be pulled into tub.
- 2) Bath Spa is connected to the power pack by a 15' line cord. Insert plug into power pack with indexing tab facing down.
- 3) Plug power pack into 120V wall outlet. Make sure power pack is not on the floor of the bathroom, to minimize water exposure to the power pack.
- 4) Fill bathtub with water.
- 5) Adjust height of motor assembly so that outlet nozzles are beneath water. This can be done by moving the motor assembly up and down vertically; the housing employs detentes which will hold the motor assembly at the desired height. **KEEP THE WATER LEVEL ABOVE THE FILL LINE.**
- 6) Point the water output nozzles downward.
- 7) Adjust the bubble control switch on the side of the unit to either “Jet Stream” or “Bubbles” (see Fig. 1).
- 8) Turn the knob on the top of the bath spa to ON.
- 9) Adjust the water output nozzles to create customized water flow in your bathtub. The nozzles can be rotated to customize the direction of the water flow.
- 10) After use, turn the knob to the OFF position, drain water from tub, then remove Bath Spa.
- 11) Rotate your Bath Spa gently over the bathtub to remove excess water, and dry with a soft cloth before storage.

**CAUTION: IF BATH SPA FALLS AND BECOMES COMPLETELY IMMERSSED IN WATER IN TUB, DO NOT PANIC. THE BATH SPA HAS BEEN DESIGNED TO WITHSTAND SUBMERSION. ALWAYS REMOVE UNIT FROM BATHTUB. PRESS OFF BUTTON, DRAIN WATER FROM UNIT AND STORE IN A DRY PLACE.**

## IMPORTANT

Keep hair, fingers, skin and loose clothing or articles away from suction openings located on sides of unit while Bath Spa is in operation. Otherwise, personal injury may result. Use of shower cap is recommended for persons with long hair. Discontinue use of any oils added to bath water that may affect performance of unit.

Fig. 2

## USER MAINTENANCE INSTRUCTIONS

You may experience some water spray if the unit shifts during operation. Do not overfill your tub. For best results, get into your tub before filling (note: too much water can cause overflow).

The Conair® Dual Jet Bath Spa can help you relax, relieve tension, and soothe sore muscles. Consult your physician or physical therapist for recommendations regarding bath spa use, including water temperature, duration, and frequency.

## CARE AND MAINTENANCE

- 1) Keep your unit clean and clear of obstruction. Check the outflow control and water intake periodically to make sure they are free of obstruction, hair, lint, and other particles that could block air or water flow. Clean inlet filters by removing filter caps, clean by rinsing in a reverse water flow in a sink or tub. Reinsert on Bath Spa by using the provided alignment marks. See “fitting and Removing Filter Caps.”
- 2) Store your Bath Spa in a cool, dry place. Loosely coil the charge cord and lay flat to store. Do not wrap cord around bath spa.

## FEATURES

- 1) Dual multidirectional water jets
- 2) Telescopic housing
- 3) Jet stream or bubble option
- 4) Removable filter
- 5) Compact convenience

## CLEANING AND DISINFECTING YOUR BATH SPA

- 1) Your Bath Spa can be cleaned with any mild detergent or soap. Cleaning is recommended after each use.
- 2) Disinfect your unit periodically to keep it bacteria free. With frequent use, disinfect weekly. With infrequent use, disinfect after each use.

## RECOMMENDED MASSAGING TIMES

Spa massage should generally last only 15–20 minutes.

**Caution:** Read safety rules and operating instructions carefully. This product is intended for indoor use on permanent, right-wall tubs. Do not use outdoors or on the walls of inflatable tubs or pools.

## HOW TO ATTACH YOUR BATH SPA TO YOUR TUB

- 1) Make sure the power knob is in the OFF position. The tub should be clean and empty of water.
- 2) Extend the folding arm and position unit along edge of tub so the unit is inside the tub and the arm is resting on edge (Fig. 3).
- 3) Moisten suction cups on motor housing of Bath Spa to increase grip.
- 4) Secure suction cups by gently applying even pressure on Bath Spa against tub wall (Fig. 3).
- 5) Adjust suction cup on arm so that it adheres directly onto bathtub edge. See Fig. 4 and Suction Cup Position Adjustment section following (Fig. 6).
- 6) Adjust height of motor assembly to desired depth by moving motor housing up or down by hand. Built-in detentes will hold the position you desire (Fig. 5).
- 7) Water may spray if unit is not level when turned on.

Fig. 3

Fig. 4

Fig. 5

## SUCTION CUP POSITION ADJUSTMENT

Suction cup underneath the handle can be in 1 of 2 positions to suit different bathtubs. (See Fig. 6)

Push and slide the suction cup to the desired position.

**Position A:** The outermost position for thick-sided tubs.

**Position B:** The innermost position for thin-sided tubs.

Fig. 6

## FITTING AND REMOVING

### FILTER CAPS

#### TO REMOVE CAPS

- 1) Turn cap about 20° counterclockwise (Fig. 7). (Filter caps are located on either side of the motor assembly.)
- 2) Line up single hash mark on cap with the center seam on the back body of the unit.
- 3) Pull cap away from unit.
- 4) Rinse cap under water to remove hair, lint, etc.

#### TO REPLACE CAP

- 1) Push cap into body so that single hash mark on cap lines up with the center seam on the back body of the unit.
- 2) Turn cap clockwise about 20° until the double hash marks on the cap line up with the center seam on the back body of the unit.

**WARNING:** To protect from excess lint, hair, etc. getting caught in motor, unit should never be used with the filter mesh removed. Injury or damage to unit could result.
