**Troubleshooting**

- **How to use iCare**
- **Installation instructions**
- **Control the device rotation**
- **Operate the device App**
- **Install the device**
- **Setting**
- **Troubleshooting**
- **Installation instructions**
- **How to use iCare remote control**
Congratulations!

• The device setup is complete. You will hear two beeps when the device setup completes.

• The green LED remains on when Wi-Fi is working properly.

Installation Instructions

1. Choose a location offering you the best viewing angle. Make sure that an electric outlet is within 2 meters.
2. Use pencil to mark hole locations. Make sure holes are slightly smaller than anchors. Insert anchors to wall and secure holder to wall with screws.
3. Insert anchors to wall and secure holder to wall with screws.

LED Indication:

New LED:
• The LED is stable when you power on the device.
• The LED flashes once per second when the QR scan is in progress.
• When LED is flashing twice per second, the device is in use and someone is actively viewing it.
• When LED is flashing 3 times per second, the setup process was successful.

Green LED:
• When LED is flashing once per second, the device is trying to connect to a Wi-Fi AP router.
• When LED is constant, the device is connected to Wi-Fi and working properly.

Alert Detection: Wi-Fi
