

FCC Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: a) Reorient or relocate the receiving antenna b) Increase the separation between the equipment and receiver c) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected d) Consult the dealer or an experienced radio/TV technician for help.

Note 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

mCable™

USER GUIDE

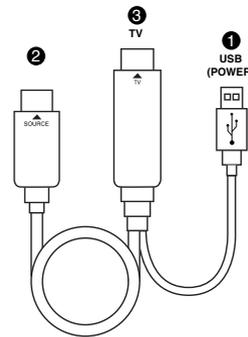

Congratulations on your mCable™ purchase!

The mCable delivers the best possible picture to your HD or 4K TV by up-converting 480p and 720p content to 1080p, up-converting 1080p content to near-native 4K (for 4K TVs), and providing other picture improvements such as noise reduction, edge restoration (great for reading on-screen text), color enhancement and more. With the mCable every pixel is enhanced to deliver a stunning result!

Installation:

- 1 Power-up your mCable's built-in video processor by plugging the USB connector into an available USB port on your HDTV.
- 2 Connect the smaller mCable connector labeled 'Source' to the HDMI port on your source device (Blu-ray player, cable/satellite box, etc.).
- 3 Connect the larger mCable connector labeled 'TV' to an available HDMI port on your HDTV.
- 4 Use your TV's remote control to select the HDMI input that the mCable is plugged into so it receives the signal from that HDMI port.

Usage Tips for Optimal Performance

The mCable performs at its best when your DVD player or streaming device provides the original video without extra processing or scaling by the player or streaming device. See the tips below to maximize your viewing experience with the mCable.

DVD Players

- When playing a standard DVD disc (480p), on a standard DVD player, set the output resolution of the DVD player to 480p.
- When playing a Blu-ray Disc on a Blu-ray DVD player, set the output resolution to 1080p and make sure that 24p output is enabled in the setup menu. Disable 4K output if this option is available.
- When playing a standard definition DVD on a Blu-ray change the DVD player's output resolution to 480p. Remember to change it back to 1080p when playing Blu-ray discs.

Cable Boxes, DVRs, Streaming Boxes

- For most source devices that do not include content upscaling features, the mCable is a simple 'plug-in and play' operation.
- Please visit www.marseilleproducts.com for detailed information on any settings that may need to be adjusted on your specific source device and/or HDTV to maximize the effectiveness of the Marseille cable. We have an ever-growing library of information to help you get the best possible performance from your mCable.

Important Safety Information

Handle the Marseille mCable with care. It contains sensitive electronic components.

Attach and detach the mCable by grasping the HDMI plug and inserting it straight into the TV and player HDMI sockets. Do not pull on the wires to detach the mCable, and do not bend or apply excessive force when connecting to your equipment.

Be sure the mCable is not stepped on, pinched, or kinked. The mCable may become warm during normal use. Always allow adequate ventilation around the mCable.

Do not install the mCable near any heat sources such as space heaters, heater vents, or radiators.

Do not use the mCable near water.

Clean only with a soft dry cloth. Household cleaners or solvents can damage the finish on the mCable.
