1. Remove plastic film and then remove paper seal on filter.
2. Insert filter into unit.
3. Remove plastic film and insert batteries.
4. Hang unit on the outside of the toilet bowl.
5. If necessary to balance the unit, place the enclosed bumper(s) on the battery cover.
6. To clean, wipe with a damp cloth. Do not immerse unit in water.
7. Motion sensor will detect your presence.
8. **VERY IMPORTANT:** Remember that the unit is motion-activated and must detect movement to continue to operate.
9. Replace filter when it no longer absorbs odors.
10. Replace batteries when unit makes chirping sound or LED lights flicker.
