Make sure the product is 100% dry before charging. Before first use, the toy needs to be charged for 4 hours using the USB power adapter (included in the box).

**Indicator lights:**
1. Power light blinking: indicates that the device is being charged.
2. Power light on: indicates that charging is complete.
3. Power light off: power not on or connected to charger.

**How to use:**
1. Standby mode: press and hold the central button until the indicator light turns blue.
2. Start and switch patterns: press the top button to start vibration; press again to cycle through the 10 vibration patterns.
3. Increase and decrease vibration intensity: increase and decrease the vibrating intensity of each pattern by pressing the left button to decrease and right button to increase.
4. Heat function: turn on the heat function by pressing the bottom button. The indicator light will turn from blue into red; it takes 3-5 minutes to heat up to 100° to 102°F on the tip. Hold bottom button for 3 seconds to turn off heat function.

While the heat function is on the LED light will flicker between red and blue. You can operate the vibrator as you normally would while the heat function is on.

5. Turn off: hold the center button for three seconds to turn off.
