

STEDI PEDI[™]

INSTRUCTIONS

It's easy...open the ***Stedi Pedi*** and pull the footpad up and forward until it "clicks" into place.

Three ways to use your ***Stedi Pedi***!

Choose the position most comfortable for your body type and flexibility level.

1. Insert between a mattress and box spring. **Important**...Make sure you push the ***Stedi Pedi*** in all the way to the line indicated on the label at the base of the extended footpad.

2. Insert the ***Stedi Pedi*** under a cushion on a couch or chair. **Important**...Make sure you push the ***Stedi Pedi*** in all the way to the line indicated on the label at the base of the extended footpad.

3. For this method you will need to stick the rubber "bumpers" provided onto the four corners of the ***Stedi Pedi*** box top. Open the ***Stedi Pedi*** and place on a chair or any other hard surface. **Important**...Make sure the hinge is at least 3" behind the edge of the chair. Place a folded towel over the back portion of the ***Stedi Pedi*** and sit on the towel to hold the ***Stedi Pedi*** secure.

Try all three methods to see which one works best for you.

See other side for more instructions

Battery Installation:

Remove battery pack from ***Stedi Pedi***. It is held in by clips under the footpad. Remove battery door and install three AA batteries (not included) per pictures inside the battery cavity. Close door and clip back into the underside of footpad making sure to keep the labeled side up. USB port should be visible through the top front of the footpad.

Plug your task light into the battery pack for extra illumination.

Also available on our website are an LED lit magnifier and a drying fan that plug into the battery pack. In addition, a separate battery pack base is available to make it easy to use all of the accessories for manicures as well.

Go to www.StediPedi.com

Foam:

The two foam pieces located in either side of the top are used to help hold items in the two side trays next to the footpad when the top is closed. The other square foam pad located in the side tray is movable and can be pushed up against bottles (nail polish, remover, etc.) to hold them securely against the front lip of the tray. You can move this from side to side for right handed or left handed operation.

Enjoy your ***Stedi Pedi!***
