

The Super Spray Hose Nozzle.

Thank you for purchasing the Super Spay Hose Nozzle.

Whether you're gardening, washing the car, or taking on a larger project, the Super Spray Hose Nozzle is the perfect accessory sprayer. It screws on to any standard garden hose and turns it into a flexible, multi-function spray tool.

Modeled after the kind of nozzle that professional firefighters use, The Super Spray Hose Nozzle can tackle a variety of jobs from a fine mist to a powerful jet stream.

Use the near-solid jet stream setting to power away tough dirt and grime, or choose the wide fan spray to saturate broad areas quickly. You can even water delicate plants with the gentle soak setting.

Made from heavy duty High density Rubber and High Grade rust proof metal, The Super Spray Nozzle is leakproof with high resistance PVC rubber and our internal high pressure ball valves are solid and reliable preventing water from leaking through the valve.

No adapters necessary. Fits all USA Standard garden hoses. Perfect for Watering your garden, washing your cars, lawn, porch, grass, and flowers.

The Soft PVC rubber design makes watering a breeze. No more tired hands. The ergonomically-designed handles are softly cushioned, anti-slip and very comfortable.

6 POWER FUNCTIONS:

- 1- JET STREAM –
- 2- HIGH STEADY STREAM -
- 3- MEDIUM STEADY STREAM
- 4- HIGH SPRAY
- 5- MEDIUM SPRAY
- 6- LOW SPRAY

Turn the nozzle slightly to engage the 6 different Spray functions. WIDE APPLICATION: Attach the nozzle onto any standard garden hose, then twist the forward grip to start spraying water.

How To Use:

1. Clean hose end threads on standard garden hose by wiping out any mud, dirt, or embedded debris.
2. Check nozzle rear main O-ring for proper placement before screwing nozzle onto hose.
3. Screw Hose Nozzle onto the threaded end until it fits snugly.
4. Turn hose spigot open to let water flow through the garden hose.
5. Check for leaks and make any required adjustments.
6. Adjust hose nozzle to produce desired spray pattern.
7. Twist nozzle to full off position when finished watering, rinsing, or in between uses on a job.
8. Shut off hose spigot when finished with the hose.

Please Note: The nozzle depends on your water pressure, the amount of water you can pump out. If you have a good water pressure, the nozzle will produce a very strong stream.
