

Luggage Scale™ Locking Travel Strap

Assembly instructions

How to set your combination

The original number is 0-0-0. To set your personal combination, follow these steps:

1. Set the dials at its original number 0-0-0.
2. To set your personal combination number, Slide the small silver lever on the back to the set position. **B**
3. Once the small silver level is set, Select the combination number of your choice, for example 1-2-3
4. After you have selected your personal combination number, Slide the small silver lever back to the off position. **A**
5. Your personal combination number is now set.

Main Functions

Press **(on/off)** **C** to turn the display on. The display should be clear and bright. If is displayed, replace the battery.

start up mode →

Press the **D** in **start up mode** to change between **Metric** or **Imperial**. (Kg and Lbs)

→ Default Unit is Kg
Same unit as previous use is displayed until battery is replaced.

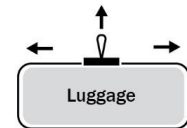

Attach the strap to your luggage and lift the luggage with the weight pull strap.

Lift until **Hold** is displayed. Place the luggage down and the weight of the luggage will be displayed.

Reading Hold

Note: The weight reading will not **Hold** in the display if the weight is less than 1Kg (2.2lbs)

Err will be displayed if your luggage is over 40 Kg (88 lbs)

For accurate readings, please ensure that when weighing, the luggage is perpendicular to the strap and centered on the container.
Do not obstruct the strap handle when lifting.

How to Lock and Unlock

1. To unlock and open your case, input combination number, and pinch the sides to release the lock clip.
2. To lock, Set dial to combination and then insert clip into lock clip; then scramble

How to weigh your luggage

1. Securely wrap the strap around the luggage, ensuring a tight fit.
2. Adjust the straps to ensure the lock is snugly positioned and won't slip off.
3. Fasten the lock securely in place.
4. Lay the suitcase down and press the power button.
5. Set the weight to read either Kilograms or Pounds.
6. Lift the luggage by the weight pull strap

Tare Function

Note: In Tare function, The container must weigh more than 1 Kg. (2.2lbs)

Weigh the container by itself first

Once the container reads a **Hold** continue to lift and press the **D** button to record the weight.

D →

This will reset the scale and record the weight

Put the luggage into the container to be measured and weigh it. The luggage contents will be displayed only on the screen

D →

Press **D**, the scale will display 0.0Kg/Lbs. Put the luggage and container down, the gross weight will be displayed on the screen.

Put down Luggage

Press **D** briefly to reset the display to 0.0 Kg/Lbs ,
Press **C** to turn the display off.

Warning

This product contains a button or coin cell battery. A swallowed button or coin cell battery can cause internal chemical burns in as little as two hours and lead to death. Dispose of used batteries immediately. Keep new and used batteries away from children. If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.
