

PICKLEBALL BALL RETRIEVAL TUBE

ITEM NUMBER: **52870**

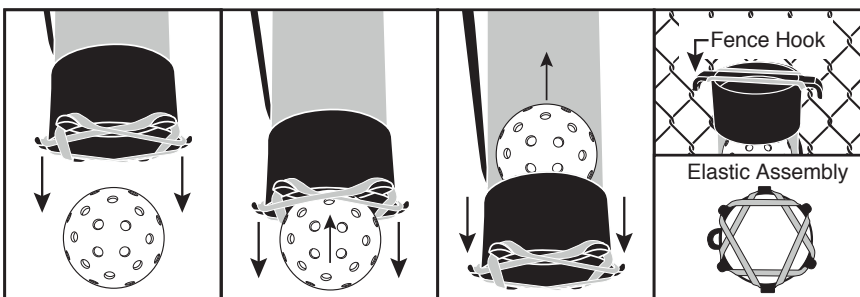

PARTS: (1) Pickleball Tube, (1) Shoulder Strap, & (3) Elastics (plus 8 extra elastics)

USING THE PICKLEBALL RETRIEVAL TUBE:

The Retrieval Tube makes it easy to transport, store and clean the court of pickleballs in no time.

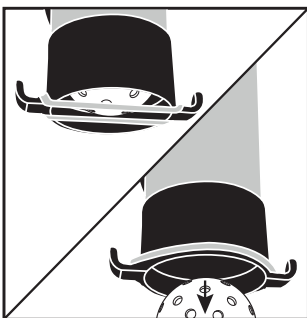

QUICKLY PICKS UP PICKLEBALLS!

No more bending over to clean up the court! To pick up a ball, place the end of the retrieval tube that has the double elastics (the non-fence hook end) over the top of a pickleball and press down over the ball. The ball will press through the elastics on the end and remain in the tube until you release them. The tube easily and quickly can pick up and store up to 12 pickleballs. Need to store the tube courtside? Simply hang it on the fence with the included fence hook!

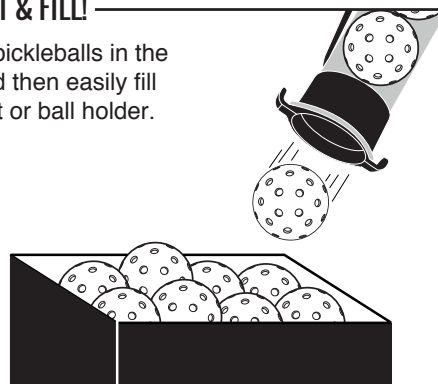

NEED A PICKLEBALL? TAKE A PICKLEBALL!

Once you have collected pickleballs in the tube, simply remove the single elastic from the fence hook end and the pickleballs will slide out. Dispense one or the whole tube! Return the elastics to the end of the tube to keep any remaining balls in place.

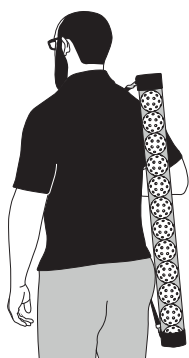

COLLECT & FILL!

Collect pickleballs in the tube and then easily fill a basket or ball holder.

EASILY TRANSPORTABLE!

The included shoulder strap makes for easy transport and storage of pickleballs. Simply adjust the strap and place the Retrieval Tube over your shoulder and GO!
