## Troubleshooting

Not working?

1. Did you turn your book on?
2. Did you touch number at top?
3. Did your book snore? It means it entered 'snooze mode'. You'll need to toggle on/off to reset your book.
4. Still quiet? It's rare, but sometimes batteries die in transit. In lieu of returning, please contact me. We're a small business and returns hurt. I'll make it right!
